

Nuclear & Energy

DAHER signs a Memorandum Of Understanding (MOU) with Tenex, subsidiary of Rosatom

Le Bourget (France), October 15, 2014 – During the WNE - World Nuclear Exhibition , Patrick Daher Chairman and CEO of DAHER, a tier-1 equipment supplier to the high-technology industries, exhibiting on stand F46, has signed on October 14, a MOU, (Memorandum Of Understanding) with Tenex, subsidiary of Rosatom.

Already a partner of Tenex, a subsidiary of Rosatom, this signature is another step toward a continuation and an expansion of DAHER activities with the Russian player in the nuclear industry.

TENEX, a wholly-owned subsidiary of the State Atomic Energy Corporation "Rosatom", is an internationally recognized supplier of commercial uranium products.

TENEX has a necessity to arrange for transportation of a range of different nuclear and radioactive materials to be delivered from Russia or to Russia as well as the storage and book-transferring thereof and is willing to expand its current business into the area of rendering transportation, storage, packagings, handling and other logistics services to various nuclear fuel cycle market participants in cooperation with DAHER.

*Lyudmila Mikhailovna Zalimskaya,
(TENEX General Director) and Patrick
Daher, (DAHER Chairman and CEO)*

DAHER and TENEX both possess certain unique nuclear fuel related technology and capability and desire to seek mutual synergy from their complementary skills and strength as well as to contribute to sustainable and safe development of peaceful nuclear energy industry by creation of additional values to the potential mutual customers.

Through this MOU, DAHER and TENEX have expressed a mutual desire to explore the opportunity and feasibility of a potential collaboration with each other and joint initiatives in a variety of nuclear industry related fields linked to their main businesses, which may lead to a development of a mutually beneficial business.

About DAHER - www.daher.com

DAHER is a tier-1 supplier to the high-technology industries.

DAHER offers its "Manufacturing & Services" model across the Aerospace & Defence, Nuclear & Energy and Capital Goods sectors. With a robust engineering-based approach, DAHER is able to deliver innovative and differentiating solutions to its industrial customers.

Founded in 1863, DAHER is an international group, with a presence in 12 countries worldwide. DAHER posts turnover of nearly a billion euros, and its order book stands at around three years of turnover.
