

Courbevoie, October 10th 2014

EXHIBITION: INGÉROP WILL PARTICIPATE IN THE WORLD NUCLEAR EXHIBITION (WNE) 2014 IN PARIS

The event, which will be held at the Bourget Exhibition Center next to Paris from October 14th to 16th and where more than 7,000 visitors are expected is the meeting point of all the players in the civil nuclear industry representing more than 31 different countries.

The exhibition will be an opportunity for the Group INGÉROP to present its projects including Cigéo, for which Ingérop was appointed by Andra in 2012 to provide the system engineering studies. Together with Technip within the GAIYA consortium, the companies manage all the project subsystems.

If authorized, the deep-geological-repository storage center will house high and intermediate-level long-lived waste generated by the French nuclear power plants and its spent fuel.

This ambitious program, which is one of the largest in the world, has unique advantages: high level of safety and automation, reversibility of storage for at least 100 years and integration of surface facilities in the landscape and the region.

Multidisciplinary technical coordination and cross-disciplinary skills required for this project involve the whole know-how and expertise of Ingérop on various fields: industrial architecture, design of nuclear facilities, geology, hydrogeology, civil and earthquake engineering, mechanical and handling engineering, nuclear ventilation, electricity, landscape architecture...

With its commitment of over 10 years in the nuclear industry through many projects, such as ICEDA with EDF or DIADEM with CEA, and its 43 offices worldwide, Ingérop has become a reputable player in a constantly evolving nuclear market. The group is definitely ready to meet the demands of different countries developing projects for nuclear waste disposal: Germany, UK, Sweden, Czech Republic or Finland.

About Ingérop

Ingérop which head office is based in Courbevoie (France) is a fully independent engineering company with almost 1,600 employees and with a 2013 turnover exceeding 189M€, of which nearly 15% internationally. INGÉROP is oriented around five business lines: infrastructure, town planning & public transportation, water & environment, buildings, energy & industrial facilities. Active in more than 60 countries, Ingérop continues its steady growth both in France and abroad by serving the investments of its public and private clients thanks to its independent shareholding, technical expertise and innovation capacity.
