

Lemer Pax, The world leader of laminated glass

Lemer Pax delivers its anti-radiation laminated glass all over the world. After South Korea, where a lead-glass viewing window, 195 mm thick and 1000 mm by 1000 mm wide for a total weight of 1000 kg, has been delivered for civil nuclear, it is up to Russia and Poland to benefit

from this high-end technology perfectly mastered by the French company. Indeed, in terms of dimensions and performance, **Lemer Pax** is the only company in the world to succeed in this challenge.

The absolute record managed to this date by the French company is a 560 mm thick lead-glass window.

Lemer Pax, partner of the CEA since it was founded, designs and produces radiation protection equipment ranges designed for the medical world, research, industry and nuclear protection.
