

SPX Extends Agreement with Krilinux for the Supply of ClydeUnion Pumps

PARIS, France, October 14, 2014 – SPX, a leading manufacturer of flow technology solutions, has extended its agreement with the Spanish power solutions experts, Krilinux Power Solutions, for the supply of its ClydeUnion Pumps products.

SPX is committed to developing solutions to support the power generation industry. Its ClydeUnion Pumps' solutions are widely used and provide proven reliability and efficiency in critical applications. Krilinux Power Solutions, located in Bilbao, Spain, already has other SPX brands within its portfolio and has successfully represented them for a number of years. This strategic partnership will increase Krilinux's relevance and portfolio to its customer base through a new product offering that is well aligned with its existing business.

Colin Elcoate, VP Business Development – Power at SPX, commented, “Krilinux has in-depth understanding and experience in power solutions and has successfully represented SPX Dry and Wet Cooling and Copes Vulcan brands for many years. It is an extremely professional business, has broad knowledge of applications within the power industry and detailed understanding of the technology it represents. We are confident that the service Krilinux provides will add value to the ClydeUnion brand and its local customers”

Krilinux has successfully represented the SPX Cooling Technologies and Copes Vulcan brands for several years and the relationship between the companies is an established one. Its success in power generation projects comes from a strong relationship with the industry and its consistent supply of high quality, high performance solutions.

NEWS RELEASE

Fidel Olozaga, Deputy General Manager, Krilnex Power Solutions said, “ClydeUnion Pumps is an excellent brand and produces extremely high quality products that meet the modern demands of the power industry. We continually strive to ensure we offer the best solutions to our customers, delivering real value, efficiency, reliability and performance to their applications. The ClydeUnion Pumps brand will extend our offering in line with this approach and is sure to be well received.”

Both SPX and Krilnex place value on assured quality, performance, efficiency and safety in power applications. The commitment both companies have to supporting and developing their solutions for the power industry has made the partnership a successful one. The addition of the leading ClydeUnion Pumps brand to the Krilnex portfolio is a natural next step for both parties and is sure to bring increased benefit to their customers.

About SPX:

Based in Charlotte, North Carolina, SPX Corporation (NYSE: SPW) is a global, multi-industry manufacturing leader with approximately \$5 billion in annual revenue, operations in more than 35 countries and over 14,000 employees. The company's highly-specialized, engineered products and technologies are concentrated in Flow Technology and energy infrastructure. Many of SPX's innovative solutions are playing a role in helping to meet rising global demand for electricity and processed foods and beverages, particularly in emerging markets. The company's products include food processing systems for the food and beverage industry, critical Flow components for oil and gas processing, power transformers for utility companies, and cooling systems for power plants.
